

- What do I want to learn or understand better?

I want to have a deeper understanding of the scrum process. Specifically how large we should keep tasks and user stories on our scrum board. I also need to learn a bit of java script so i can be of help when needed.

- How can I help someone else, or the entire team, to learn something new?

Keep assisting others in areas where I have learned more and make myself available for help.

- What is my contribution towards the team's use of Scrum?

I have actively written and broken down user stories as well as tasks and later been part of getting them done.

- What is my contribution towards the team's deliveries?

I have been working on the booking page and the admin page, written HTML and CSS code for both of them while trying my best to help and teach my peers. I have also been an active part in group discussions. I have also learned a bit about how gitignore, but for the time being it seems like gitignore won't be need
