

- What do I want to learn or understand better?

Now that we are in the end phase of the development I still do not feel there is too much more that I want to learn or understand better.

- backend works How can I help someone else, or the entire team, to learn something new?

Keep assisting others in areas where I have more knowledge and make myself available for help.

- What is my contribution towards the team's use of Scrum?

I have written and broken down user stories as well as tasks and later been part of getting them done.

- What is my contribution towards the team's deliveries?

I have, together with others, focused on small fixes that we found through granny testing the web site. We have added the functionality to set up time slots through the admin page alongside some changes to the calendar.
