

- What do I want to learn or understand better?

I would like to learn more about the scrum process. Especially how a team can incorporate it to make agile decisions. I also want to get a better understanding of how the different parts of a website is connected.

- How can I help someone else, or the entire team, to learn something new?

Make sure that I am available if someone needs help or someone to discuss a problem.

- What is my contribution towards the team's use of Scrum?

I have spent time breaking down user stories into tasks and taking part of finishing the tasks.

- What is my contribution towards the team's deliveries?

I have been working on the admin and booking page. The focus of this week was to make the website look professional and to make sure that you can navigate on the website. This is important so we can show value to the client as fast as possible. With a professional and the functionality to navigate the website it is easier for the client to grasp the end product and can more effectively give feedback. I have also spent some time learning JavaScript since it will be used.
