

- What do I want to learn or understand better?

I want to have a better understanding of javascript. At the time I have an overall understanding of the javascript we use in our project, but not at any deeper levels. I also want to learn how we are going to implement the calendar because I believe it is one of the main challenges of our project.

- How can I help someone else, or the entire team, to learn something new?

Keep assisting others in areas where I have more knowledge and make myself available for help.

- What is my contribution towards the team's use of Scrum?

I have written and broken down user stories as well as tasks and later been part of getting them done.

- What is my contribution towards the team's deliveries?

I have gathered images and written CSS code to refine the looks of the startpage and other pages connected to it. I have also learned a bit of javascript and written some lines of code myself.
