

- What do I want to learn or understand better?

I want to improve my skills in HTML, CSS and JavaScript from high school since it looks like we will be using those languages in the project. I also need to improve my skills in incoming up with user stories and break those down into smaller task through horizontal and vertical slicing. Another thing related to the project I need to improve on is how to use git.

- How can I help someone else, or the entire team, to learn something new?

I can help those team member which have zero experience in HTML, CSS and JavaScript to get going since I have some prior experience.

- What is my contribution towards the team's use of Scrum?

I haven't done much in this regard so far.

- What is my contribution towards the team's deliveries?

I have worked on the business model canvas for the project as well as being active in group discussions. Also worked briefly on the low-level prototype.
