- What do I want to learn or understand better?

Now that we are in the end phase of the development I do not feel there is too much more that I want to learn or understand better. I guess there still is more to be learned about the server communication, but not so much that is necessary to the project.

- backend works How can I help someone else, or the entire team, to learn something new?

Keep assisting others in areas where I have more knowledge and make myself available for help.

- What is my contribution towards the team's use of Scrum?

I have written and broken down user stories as well as tasks and later been part of getting them done.

- What is my contribution towards the team's deliveries?

I have, together with others, focused on small fixes that we found through flow testing the web site. Alongside the small changes we have written CSS for a more complete look of the calendar.
